TOPIC AREA LISTING FOR USSR SPACE LIFE SCIENCES DIGEST ISSUES 5-9

The following pages give bibliographic citations and key words for abstracts published in issues 5-9 of the USSR Space Life Sciences Digest grouped according to the topic area categories under which they were originally included. Topic area categories are listed in alphabetical order. Within categories, abstracts are grouped according to the Digest issue in which they appeared. At the beginning of each topic area there is a set of cross references referring the reader to abstracts within other relevant topic areas. For example, the cross reference "Adaptation 4" under the topic area "ENDOCRINOLOGY" indicates that the fourth abstract listed under the topic area "ADAPTATION," is also relevant to the field of endocrinology.

Following this section is a key word index; numbers in this index refer to page numbers in this topic area listing.
